Resolution No. 9: Recognition of the Importance of Integrated Service Delivery for the Support of Children and Families in Manitoba

WHEREAS the integration of child protection services with other related services for children such as public health, counselling, FASD prevention, maternal and child health and child care has proved to be a success in better supporting children and families and in breaking the cycle of child apprehension; and

WHEREAS that success has been demonstrated in Nelson House under the Nisichiwayasihk Cree Nation Family and Community Wellness Centre and in Brandon with West Region Child and Family Services; and

WHEREAS the integration of services works very well in Nelson House to provide an effective circle of care for each child and family, is consistent with the widely used Signs of Safety approach to insure the safety of the child and helps families stay together; and

WHEREAS the approach in Nelson House has been associated with drastic reductions in youth crime, relapse of addictions and, most importantly, a 43% drop in child apprehensions and removal of children from their homes; and

WHEREAS the integrated services delivery model using multimodal family and child support brings all affected organizations to the table in determining the best course of action to address the individual child; and

WHEREAS this approach enables all organizations to understand one another's roles in respect to the welfare of a child; and

WHEREAS this collaboration remedies the issues of the overlapping and duplicating of services between already stressed resources.

THEREFORE BE IT RESOLVED that the Legislative Assembly of Manitoba recognize the importance of integrated services delivery using multimodal support for children and families and urge the Provincial Government to take the necessary actions to implement this cooperative and partnership model in other agencies throughout Manitoba.
