

AN ORDER OF THE CLEAN ENVIRONMENT COMMISSION  
UNDER THE CLEAN ENVIRONMENT ACT

RE: THE CLEAN ENVIRONMENT COMMISSION and THE DEPARTMENT OF TOURISM, RECREATION AND CULTURAL AFFAIRS of THE PROVINCE OF MANITOBA, Applicant,

WHEREAS pursuant to the provisions of the Clean Environment Act, the Department of Tourism, Recreation and Cultural Affairs, filed an application with the Department of Mines, Resources and Environmental Management in connection with the operation of a sewage lagoon system, with discharge of effluent via a ditch to Dorothy Lake, the said system being located in Section 10, Township 14, Range 13 EPM in the Whiteshell Provincial Park and serving the Dorothy Lake Recreational Area;

AND WHEREAS in the absence of limits being prescribed by a Regulation under the said Act, the said application was referred to The Clean Environment Commission for the prescribing of limits;

AND WHEREAS no representation was made to the said Commission by any person who is or is likely to be affected by an Order of the said Commission in connection with the said operation;

AND WHEREAS the Clean Environment Commission considered the application on the 29th day of August, 1977;

IT IS HEREBY ORDERED THAT

1. The Applicant shall ensure that the said sewage lagoon system is maintained and operated in such a manner as to:
  - (a) minimize the release of offensive odours;
  - (b) prevent groundwater contamination;
  - (c) ensure that the organic loading on the primary cell of the said system, in terms of the five-day biochemical oxygen demand, does not exceed 50 pounds per acre per day;

*assigned

771005*

1. (cont'd)

(d) ensure that no discharge of effluent takes place between the 1st day of November of any year and the 15th day of September of the following year without the written permission of the Environmental Management Division of the Department of Mines, Resources and Environmental Management.

2. The Applicant shall ensure that the quality of the effluent from the said sewage lagoon system is such that:

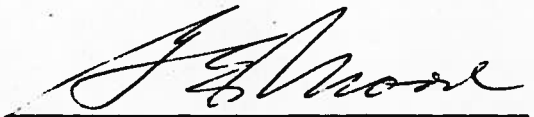

(a) the five-day biochemical oxygen demand is not in excess of 30 milligrams per litre;

(b) the total coliform content, as indicated by the MPN index, is not in excess of 1500 per 100 millilitres of sample.

Order No. 751

Dated at the City of Winnipeg

this 30th day of September, 1977.

Chairman,  
The Clean Environment Commission.
