Dear Mr. Moffatt:

Re: Cloverdale Paint Inc. – Environment Act Proposal

The Environment Act Proposal you submitted on July 28, 2014 for the continued operation and expansion of Cloverdale Paint manufacturing plant located at 50 and 70 Panet Street, Winnipeg, MB has been reviewed. At the minimum the following additional information is required before we proceed with processing the proposal:

1. The plant operation time and production capacity for each product manufactured.
2. Detailed process description quantifying VOC emissions vented to the environment from each product manufacturing stage. The information provided in Appendix F is not complete as it considers only emission into the indoor environment.
3. Detailed list of all VOC species potentially released to the environment and all VOC containing materials used in the facility including their Material Safety Data Sheet.
4. Any available VOC emissions capture or control technology installed in the facility with detailed exhaust system. Consider both point and fugitive emission sources.
5. Detailed description of the baghouse and its operation and maintenance procedure.
6. Any particulate analysis performed on the particulate filtered by the baghouse and those exhausted through a stack.

Please contact the undersigned at (204) 945-7023 or Eshetu.Beshada@gov.mb.ca with any questions.

Yours truly,

Eshetu Beshada, Ph.D., P. Eng.
Environmental Engineer
