SUBJECT: EAP Boeing – Mfg Facility File:3009.10

HRB File #: AAS-16-10627

Conditional Approval

This EAP has been given clearance at this time as there are no further plans for developments which will cause ground disturbance. However, if future developments are planned in which construction activities may impact the landscape or cause ground disturbances, the Historic Resources Branch is requesting that prior notification is given so that any possible impacts to heritage resources can be determined and mitigated as necessary.

If at any time, however, heritage resources are encountered in association with these lands the Historic Resources Branch may require that an acceptable heritage resource management strategy be implemented by the developer to mitigate the effects of development on the heritage resources.

While the potential to impact significant heritage resources was deemed by Boeing to be low, by reason that the plant is located in an established industrial zone (Section 5.3, page 14), a burial mound has been identified on the Murray Park property (as per Appendix G, page 92). The Historic Resources Branch, therefore, must be immediately contacted if heritage materials are encountered during development.

Future EAPs must include the provision concerning the possibility of encountering heritage sites, and contain a plan outlining appropriate measures to mitigate those impacts upon such an encounter.

If you have any questions or comments, please feel free to contact me at as above.

SUBJECT: Boeing Canada Operations Ltd. – Manufacturing Facility (File. 3009.10)

Air Quality Section has reviewed the above proposal and provides the following comments:

- It is expected that the proposal has no significant impact on air quality provided that potential dust and particulate emissions from material cutting; resin and other gaseous emissions from proposed autoclave operation; and VOC emissions from paint mixing and operation will be managed as mentioned in the proposal.
- Air Quality Section suggests that the EA Clause regarding noise and odour nuisance be included.

RE: Boeing Canada Operation Ltd. – 99 Murray Park Road – Notice of Alteration
Client File No. 3009.10

Dear Ms. Braun:

MIT has reviewed the proposal under the *Environment Act* noted above and we do not have any concern with the proposed development.

Thank you very much for providing us the opportunity to review the proposal.

Sincerely,
