Dear Mr. MacDonald:

Re: Evergreen Environmental Technologies, Licence No. 270 HW R – Notice of Alteration for Additional Household Hazardous Waste and Licence No. 2612 RR – Extension request for Gasification Pilot Project.

Receipt of your January 15 and January 22, 2019 letters are acknowledged as a notice of alteration in accordance with section 14 of The Environment Act.

Licence 270 HW R: The requested change to the Development as licenced is for inclusion of additional types of household hazardous wastes, operated in accordance with Product Care Association of Manitoba.

The potential environmental effect of the requested change to the Development as Licensed is insignificant; therefore the additional household hazardous wastes have been registered with the department for collection.

Licence 2612 RR: The requested change to the Development as licenced is for an extension to March 31, 2021 to allow additional time, due to now having secured funding and design/construction being undertaken.

The potential environmental effect of the requested change to the Development as Licensed is insignificant, and considered to be a minor alteration in accordance with section 14(2) of The Environment Act. In accordance with internal policy for pilot projects to operate for one year; an extension is granted until March 31, 2020 for testing of the gasification system. Please notify cory.graham@gov.mb.ca 5 days prior to the date of commissioning the gasification system.

Due to changes to the Dangerous Goods Handling and Transportation Act in 2018, Licence 2612 RR will be revised to include conditions from Licence 270 HW; for a single licence issued to the Development.

Please be advised that this approval is contingent on the acceptance of a revised Licence that will be issued in the near future. If you have any questions on this matter, please contact Ms. Cory Graham at cory.graham@gov.mb.ca or (204) 250-7645.

Yours sincerely,
