Category	Summary of Community Feedback	Response and/or Mitigation	Environmental Protection Program Component
EPP	York Factory believes that it is in the vicinity of the project, and indicated the community undertakes a range of activities in the project area. York Factory has a treaty land entitlement (TLE) selection in close proximity to the project.	Manitoba Hydro has committed to meeting with the community to better understand the community's use of the Project area and incorporate any sensitive sites into the Environmental Protection Program. Manitoba Hydro will also notify the community of Project schedule and construction activities.	
TLE	There was discussion of the Environmental Protection Plan (EPP), York Factory's interest in monitoring and mitigation, and the potential for York Factory to contribute to the development of the plan. York Factory indicated they would follow up with MH to plan a workshop within the community.	Manitoba Hydro continues to have discussions with York Factory First Nation and looks forward to meeting to further discuss the Environmental Protection Program.	Project Environmental Protection Plan
