**Subject:** FW: Request for review & comments - Municipal Waste Used Oil Facility - File: 5646.00 -  
Closing date: June 3, 2013

Good Afternoon,

The Office of the Fire Commissioner has reviewed the proposal for the construction of a used oil collection facility within the RM of Glenwood file # 5646.00.

The OFC recommends that the license requirement stipulate that the applicant register this project with the Brandon Area Planning District, and ensure that all requirements for additional building and occupancy permits are adhered to, due to the change of activity in the existing structure which may change the occupancy classification under the Manitoba Building Code (MBC).

We also recommend that an Emergency response / fire safety plan be filed and approved by the Souris Fire Department prior to Occupancy in accordance with, section 2.8 of the Manitoba Fire Code (MFC).

The OFC has no other concerns at this time.

**Subject:** DGHTA 5646.00 Municipal Waste Used Oil Facility due June 3, 2013

Hi Raj,

Fisheries Branch has reviewed this request from Municipal Waste Management Ltd. to accept and store temporarily used oil, used oils filters and oil rags at a facility at SW 35-08-21 W (5 km north of Souris). Stored material will be sent to a licensed facility for processing.

Given the location as long as there is sufficient containment for the oil products, particularly in the event of an emergency, and the containment area has a non permeable surface then there should not be any fisheries concerns with this request.

Dear Raj Rathamano

**Re: Municipal Waste Used Oil Facility - File: 5646.00**

I have reviewed the application and have the following general comments:

- i. ensure that containment measures meet applicable guidelines, both while the used oil and used oil containers are stored temporarily at the site and then during transport to the licensed receivers/recyclers.
- ii. maintain current chemical inventory lists in designated areas.
- iii. ensure availability of emergency response plan.
- iv. adequately address possible impacts at the site on surface and potential ground water by Environment Act regulations, site selection and containment areas.

Sincerely,

"Original Signed By"

Dr. Amy Frykoda, MD, CCFP, MSc  
Medical Officer of Health  
Prairie Mountain Regional Health Authority

**Subject:** Re: 5645.00 Municipal Waste Oil EAP

Mr. Rathamano,

I reviewed the above noted EAP. The EAP does not state if, where or how water for the facility will be obtained or whether it will be connected to any public or semi-public water system. It also does not note the proximity of the site to any water body which is used as a raw water source for any public or semi-public water system.

As such, based upon the information given in the EAP, I cannot comment on whether Office of Drinking Water would have any concerns respecting drinking water safety with this EAP or the proposed development.

If you have any questions, please call.

Regards,

**Sent:** May-13-13 8:15 AM  
**To:** Rathamano, Raj  
**Subject:** Municipal Waste Used Oil Facility- File 5646.00

MAFRI has reviewed this proposal for a facility at SW 35-08-21W, including the plans for any spill clean-up or remediation work. It is noted that the site is located in close proximity to a natural "pot hole" in the field, which may be a natural recharge area. As long as all procedures are followed, and as long as the site is inspected by the appropriate authorities, MAFRI has no concerns related to agricultural impact.
