Subject: EAP 5665.00 DGH&T Act - Gerdau Ameristeel - Metallics Raw Materials Transfer Faculty due Oct 21 2013

Hi Raj,

Sorry for the delay in responding. Fisheries Branch has reviewed this proposal to continue the operation of a waste lead acid battery transfer facility at 314 Dawson Road North in Winnipeg. The batteries are stored indoors in the non-ferrous warehouse which is fully covered by a metal roof and has a concrete floor throughout. The batteries are stored on pallets. The applicants are proposing to place plastic containment trays under the wooden pallets during storage. If this review is just for the temporary storage of batteries then given the information provided and the location of the facility it would appear that there are no fisheries concerns. Are the other components such as the drain tower and fluid extraction system already licenced?

Thanks Raj.

Mr. Rathamano,

I reviewed the above noted EAP and see no cause for concern in it respecting safety of drinking water.
If you have any questions, please call.

The Office of the Fire Commissioner recommends that there should be an updated Fire Safety Plan developed for the facility. The plan should be developed in cooperation with the Winnipeg Fire Paramedic Service, Fire Prevention Branch, as required by Section 2.8 of the Manitoba Fire Code and be submitted to the local fire authority for approval.
