From: Ken Allen _____
Subject: Keep Headingley Clean!

I am very am very concerned about the proposed hazardous waste site in Headingley and I want public hearing on this.

Here are the reasons why:

Is this what big corporations like GFL do to try and eliminate competition? Hire a lobbyist group to spread propaganda to citizens. Maybe they should take a look at their facility before they start making assumptions about new ones that aren't even built yet. As a citizen I'm happy to have the added tax dollars this facility will bring. We should be encouraging new businesses to the area not deterring them.

I am very am very concerned about the proposed hazardous waste site in Headingley and I want public hearing on this.

Here are the reasons why:

Too close to our homes., Land contamination possible during flood., This isn't waste from Headingley., The company is a stranger to our community., PCB's? No limit? No thanks!, Propane storage and rail line makes site dangerous., Risk to wells and water table., Our fire dept. is not equipped for hazardous waste., Lack of information and supervision., Supplying illegal oil burning., Manitoba-based companies already safe and professional., Profit for applicant safety risk for Headingley.

Is the town council of Headingley out of their freaking minds or were pockets lined for this to go through? You don't put a hazardous waste disposal site for an OUT OF PROVINCE COMPANY DIRECTOR in the backyard of Headingley or Winnipeg. You don't put a hazardous waste disposal site for an OUT OF PROVINCE COMPANY DIRECTOR in a flood plain.

A SHELL COMPANY, who owns the company? where is its Headquarters?, how are these toxic waste materials being brought to Headingley, truck???, would make for one h e double hockey sticks of an accident near a major residential area

Great timing by the council to bring this out, Graduations, Start Summer Holidays with July long weekend, lots of people away, might not see this prior to July 4th.

I don't live in Headingley but I see this as back door, sneaky, corrupt politics, and an open door meeting had better be held before any of this goes through and a vote by the citizens of Manitoba on it.

What does the Federal Government think of this, do they even know about it & doesn't all toxic waste sites have to approved by a Government not a town council???

What does the Manitoba Government think of this, do they even know about it?

What does the City of Winnipeg Govt. think of this, do they know about it?

No one wants a waste disposal site for a SHELL Company we know nothing about,IE: safety record handling toxic wastes etc. etc.

SHELL companies are set up to hide things, do we as Manitobans want this, NO, this not only impacts the residents or Headingley but all of Manitoba, as the waste has to be brought through Manitoba, on our roads and highways, towns and cities, it puts everyone at risk.

OUR GOVERNMENT Had better take a long hard look at this and get the public's input before any of this goes through.

What is the rush? I believe that the public should have been advised by public notice that this was being considered. prior to it being approved by council. there should have been a consultation process.

A public hearing is a must. All names of councillors who are approving this should be made public.

Full disclosure to residents must occur.

Stop this type of Under the table political maneuvering.

Government and town council are there to understand the will of the people and carry that will out.

Ask yourself, is this what most residents would want for their community. The answer of course will be No.

Public "Servants" must listen and act according to Tax paying people. Not their own agenda.

A Public hearing is warranted in my opinion.

I am very concerned about the proposed hazardous waste site in Headingley and I want public hearing on this.

Here are the reasons why:

Land contamination possible during flood., Propane storage and rail line makes site dangerous., Risk to wells and water table.

I am very am very concerned about the proposed hazardous waste site in Headingley and I want public hearing on this.

Here are the reasons why:

Too close to our homes., Land contamination possible during flood., This isn't waste from Headingley., The company is a stranger to our community., PCB's? No limit? No thanks!, Propane storage and rail line makes site dangerous., Risk to wells and water table., Our fire dept. is not equipped for hazardous waste., Lack of information and supervision., Supplying illegal oil burning., Manitoba-based companies already safe and professional., Profit for applicant safety risk for Headingley.

Surely an extensive study with all environmental aspects must be completed, with full disclosure. Not being familiar with Hazardous Waste Sites, are there not some that could be used?

We know that the Headingley area is prone to flooding from the Assiniboine.
We know that Headingley is prone to tornadoes, as we've witnessed in the past.
Installing a hazardous waste disposal site in proximity of residential area is a disaster waiting to happen.

If they're burning this waste, that would create a pollution problem. STINK, to put it bluntly

I live approximately 5k from this site and have been there for more than 20 years. We have a well on our property that we use in our household on a daily basis. We use it in our bathrooms to shower and brush our teeth, and in the kitchen to wash our dishes and cook our food. My biggest concern is obviously the potential of contaminating our immediate water table, and our precious environment as well.

I am very concerned about the proposed hazardous waste site in Headingley and I want public hearing on this.

Here are the reasons why:

Too close to our homes., Land contamination possible during flood., The company is a stranger to our community., Propane storage and rail line makes site dangerous., Risk to wells and water table., Our fire dept. is not equipped for hazardous waste., Lack of information and supervision., Supplying illegal oil burning.

Decrease property value. This is a pristine town & we don't want to ruin it.

* Potential negative impact to our property values due to the risks listed above. We live in Deer Pointe Park. Our area and the nearby Assiniboine Landing have exclusive executive-style homes. Average property values are \$925,000 for Deer Pointe and \$1,132,000 for Assiniboine Landing. We do not want to see our property values decrease with the development of this hazardous waste site. We choose this area for the serene, quiet, safe environment it provides.

* also potential for noise.

Switzer, Cory (SD)

From:
Sent: June-30-16 1:27 PM
To: Switzer, Cory (SD)
Subject: File No 5837.00 - Prairieview Terminals Ltd - Headingley Bulk Storage Facility

Dear Mr. Switzer,

We are writing to you regarding the "Dangerous Goods Handling and Transportation Act" application from the above which was recently advertised.

We are homeowners in Deer Pointe Park, RM of Headingley, which is located south of Roblin Blvd near Hall Road and we are very concerned about the proposed location of the bulk storage facility and recycling depot. **To help spread our concerns to the public, I was interviewed by Jeff Keele of CTV news today and his interview will be aired today during their 6pm news. We heard about this proposed site just last Friday and we are asking the government to extend the deadline for lodging complaints of July 4th a few days so that the voices of the residents may be heard.**

We adamantly oppose the approval of the application for the following reasons:

1. We are concerned about the risk of spills of hazardous materials which could be devastating and/or deadly. Although Prairieview Terminals Ltd has created "spill mitigation measures" as described in their "Development Environment Assessment Report", accidents do happen. There is always a risk of human and/or mechanical error which can result in dangerous spills of hazardous materials. They even state there is a risk in section 4.4 of their "Development Environment Assessment Report". In addition to the harm a spill or mishandling can do, we are concerned that the RM of Headingley is not equipped to handle a catastrophic environmental spill.
2. Of great concern is the open-ended description (ie. "not limited to") of the types of hazardous materials that Prairieview Terminals Ltd will accept, store, process or handle on-site. Their "Development Environment Assessment Report", section 2.4 reads, "The waste transfer site will be designed to accept hazardous materials including, BUT NOT LIMITED TO, waste oils, glycol, used oil filters, oily water and sludge". From the same report, section 4.4 reads, "Hazardous materials that will be stored, processed or handled on-site include, BUT ARE NOT LIMITED TO, used oil, blended oil, batteries and solvents". Without identifying the specific hazardous materials that the facility will accept, store, process and handle, it leaves the door open for Prairieview Terminals to handle other hazardous materials not identified specifically. That is a scary thought.
3. We are concerned about the negative impact to the positive reputation of Headingley. We moved here two years from Winnipeg because of the clean, safe, peaceful environment that Headingley provides. We are concerned that this new waste site will disrupt all of that and frankly, there can be a negative impact to our property values.

Sincerely,

Tracy Nelson

Here are the reasons why:

Too close to our homes., Land contamination possible during flood., This isn't waste from Headingley., The company is a stranger to our community., PCB's? No limit? No thanks!, Propane storage and rail line makes site dangerous., Risk to wells and water table., Our fire dept. is not equipped for hazardous waste., Lack of information and supervision., Supplying illegal oil burning., Manitoba-based companies already safe and professional., Profit for applicant safety risk for Headingley.

From: Carla Ross _____
Subject: Keep Headingley Clean!

I am very concerned about the proposed hazardous waste site in Headingley and I want public hearing on this.

Here are the reasons why:

Too close to our homes., Land contamination possible during flood., This isn't waste from Headingley., The company is a stranger to our community., PCB's? No limit? No thanks!, Propane storage and rail line makes site dangerous., Risk to wells and water table., Our fire dept. is not equipped for hazardous waste., Lack of information and supervision., Supplying illegal oil burning.

As a resident I haven't even heard of such a thing happening. We should have been able to vote on this matter as this is our community we choose to raise our families in. We weren't properly informed of such matter. If this waste could at all possibly hurt the health of our family's I'm completely against it.

A hazardous waste site would depreciate the value of all homes in the surrounding area and would make Headingley a less disireable place to live.

I am very concerned about the proposed hazardous waste site in Headingley and I want public hearing on this.

Here are the reasons why:

Too close to our homes., Land contamination possible during flood., This isn't waste from Headingley., The company is a stranger to our community., PCB's? No limit? No thanks!, Propane storage and rail line makes site dangerous., Risk to wells and water table., Our fire dept. is not equipped for hazardous waste., Lack of information and supervision., Supplying illegal oil burning., Manitoba-based companies already safe and professional., Profit for applicant safety risk for Headingley.
