

CANCER CARE PATHWAY

Wait Time Issues

Notes:

1. Each patient's care plan is individualized based on their disease, stage and current standard of care. The above paths are meant only to illustrate typical experiences and where a patient's care may be delayed due to wait times.
2. Other support processes are not included above which may also cause delays, e.g. referrals to dentistry, psychosocial support services, etc.
3. Other delays occur due to patient decision process and personal choice (e.g. vacation, family events), which are not captured here.
4. Median Wait – means half of those starting treatment waited less and half waited more than the number of weeks noted.
